

Webmedia's eHealth Suite

eHealth Suite is a fully integrated web-based healthcare IT solution for the whole country/ region/ hospital district, enabling better patient care, more efficient hospital management, healthcare cost control and availability of all patient medical information across all healthcare sites.

Developed in co-operation with the largest hospital in Estonia – Tartu University Clinics. The solution is daily used by 2500 physicians in 16 clinics since 2008.

Various deployment models include:

- Patient Administration System
- Hospital Information System
 - Inpatient, outpatient, daycare and ER processes supported
 - More than 10 functionality modules
 - Medical registries and speciality documents platform
- eHealth message fabric – integration platform
- Electronic Medical Record
- National Health Record – one platform and integration platform for all stakeholders
